# global solutions that deliver quality results

InterMedCorp has over 20 years combined staff experience providing training, consulting and management services to health and private healthcare organizations around the world.

## InterMedCorp

can conduct short-term consulting engagements. These are services that address a specific, time-limited need for the client, such as feasibility or demand study for new services, IT strategic or business planning.

Each project has a unique set of circumstances to reach a project goal, once the Program of Requirements & Project Initiation Documents have been complete InterMedCorp will commence a comprehensive assessment of current state and recommend according to the clients functional requirements & medical service delivery objectives. If this is a startup, InterMedCorp can help create a plan.

## flexible solutions for your business needs

### EQUIPMENT PLANNING

InterMedCorp will review each and every item of equipment against the functional program according to the following key criteria and propose to the client such alternatives, amendments to quantities &/or specifications as required.

- Specification fulfils/exceeds the client's functional requirements.
- "Best of breed" in technology.
- "Value for Money" - cost of ownership, consumables & serviceable life.
- Manufacturer &/or distributor can demonstrate acceptable in-country technical service support of proven competence & quality.

### INFORMATION SYSTEMS

The complexity of information services is becoming greater and greater each day. IMC has an extremely strong information systems planning background. This experience allows us to offer planning services to assist in the recommendation and project management of any particular information systems projects that your facility may need.

### CONSULTING / ASSESSMENT

InterMedCorp services can assess business need, feasibility studies, study for new services, or staffing needs

### INFORMATION SYSTEMS PLANNING

InterMedCorp has a strong information systems planning background. We offer planning services, recommendation and project management.

### EQUIPMENT PLANNING

InterMedCorp can plan equipment by recommending, planning layouts and purchase.
